- ▶ TDAP is a unique initiative focussed on supporting UK SME businesses developing novel zero emission enabling automotive technologies.
- ▶ TDAP delivers funding and expert industry support over an 18-month period – helping you to develop your ideas from concept through to viable market proposition.
- ▶ TDAP enables participants to accelerate their strategy, business case and technology development.
- ▶ Backed by the Department for Business Energy and Industrial Strategy, TDAP is delivered by the Advanced Propulsion Centre.

TDAP has supported 27 companies with over £5 million in funding

'Having a good idea is only a fraction of what makes a business. The experts helped us to understand how we could build a business around that and progress towards commercialisation.'

Marcel Fowler, New Motion Labs
TDAP Wave 2

'The APC's network of suppliers, vehicle manufacturers and potential customers is what really helps to open doors in the automotive industry.'

Haroon Ihsan, Alsitek
TDAP Wave 2

'By the end of the project we will have gone from a single proof of concept to validation in a relevant environment with partners that are recognised internationally.'

Dr Yura Sevcenco, Reaction Engines
TDAP Wave 3
