The Aerospace & D Capability Matrix

Proudly supporting

AAEROSPACE

WALES

Proudly Supporting Aerospace Wales

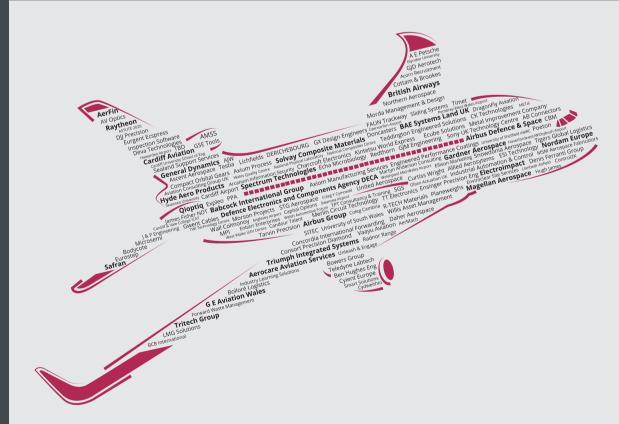

The Aerospace and Defence sector in Wales has over 180 companies employing more than 23000 people and includes 7 of the world's top 10 aerospace and defence companies. Alongside the Airbus Global Centre of Excellence for wing manufacture, other strengths in Wales include aerospace manufacturing, maintenance, repair and overhaul (MRO), interiors, materials and tooling, test equipment, ground support equipment and UAV operations.

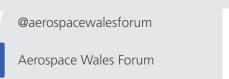

With just 3% of the UK's population, Wales is home to around 10% of the UK's aerospace industry which also includes 20% of the UK's Maintenance, Repair and Overhaul work. State-of-the-art facilities now manufacture, supply, maintain, repair and overhaul, civil and military aircraft from around the world. As such, the aerospace sector in Wales is a dynamic growth industry that operates on best practice techniques and spends £millions in the UK's supply chain every year.

The Aerospace Wales Forum is the trade association for all companies operating in the aerospace, defence and space sectors in Wales. We support our members by promoting their products and services on our website, in our capabilities matrix and trade directory and by giving them access to events, supply chain days, networking opportunities and industry expertise.

Aerospace Wales works closely with academic institutions, UK regional bodies and ADS and in particular enjoy a productive collaboration with Welsh Government.

Get in touch to become a Member. With nearly 200 members you'll be in great company!
