

AVIATION SERVICES FOR A GLOBAL STAGE  
WE ARE MRO WALES

**Aviation services for a global stage**

## **Wales MRO Hub**

Wales has been a growing centre of aviation capability for over 80 years. The Welsh aviation industry has expanded to generate over 4000 jobs. With aviation MRO as the largest market sector by far, the Wales MRO Hub is well placed to support customers on a global stage.

### **Our Vision**

Wales MRO Hub offers a unique through life service for Commercial, Defence and Business aviation. The through life service MRO solution provides a combination of services to keep an aircraft available, airworthy and economically viable throughout the whole lifecycle.

The Wales MRO Hub covers the aviation industry value chain encompassing aircraft leasing, maintenance and recycling as well as component manufacture, parts repair, ground support equipment, tooling and business aviation. Supported by Aerospace Wales, with Bro Tathan as a world leading MRO location, we are the partner of choice.

## **180+ members**

The Aerospace Wales Forum is the trade association for all companies operating in the Aerospace, Defence & Space sectors in Wales. Our industry forum serves its 180+ members by promoting company capabilities, providing access to global aerospace events, networking opportunities and industry expertise.

By supporting initiatives like the Wales MRO Hub, we seek to promote the benefits of Welsh aerospace capabilities for the global market, attracting inward investment to benefit the Welsh economy and skills development of our people. Operating for over 80 years, aerospace in Wales continues to develop and presents an attractive location for company operations.

## **MRO collaboration**

**"Aerospace Wales works collaboratively with Welsh Government, industry and academia to ensure a coordinated approach to the development of aerospace sectors across Wales.**

**We are proud to launch the Wales MRO Hub, acting as a cluster of technical expertise and through-life services to deliver an outstanding set of capabilities for the aviation industry. We are taking Wales MRO to a global stage."**

# MRO Hub Companies

## AerFin

Specialists in aircraft end-of-life solutions. The market leader for delivering flexible component support solutions to E-Jet & narrowbody markets.

## AerMach Ltd

Quality supply chain solutions offering sale, lease and exchange of assets and components for the aviation industry.

## Aerocare Aviation Service Ltd

Highly skilled, OEM trained professionals have unrivalled in-house capability providing maintenance and repair.

## Belcan

A global supplier of design, software, manufacturing, supply chain, information technology, and digital engineering solutions.

## ecube

Trusted to deliver end of life aircraft services and storage programmes for lessors, airlines and asset traders.

## European Airline Solutions Ltd

Expert providers in aviation ground support equipment, ground handling solutions, tooling and inventory management.

## PPA Group

An aircraft and yacht interiors MRO company conducting overhauls through service centres worldwide.

## Wall Colomony (WCL) Ltd

A global leader in the manufacture of superalloy powders & components.

## Willis Asset Management Ltd

A leading worldwide provider of aviation asset management and maintenance solutions.

## Winslow Adaptics

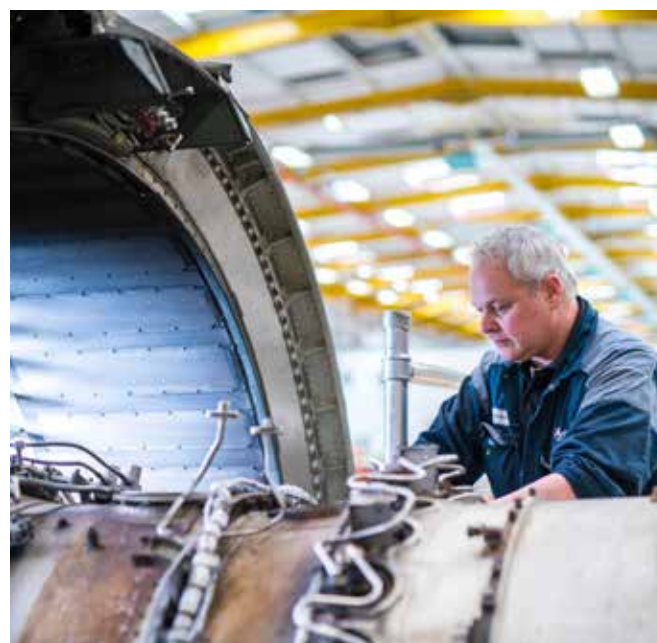

Designs and develops products to mitigate supply chain shortages and obsolescence for the harshest environments.

## About

AerFin specialise in aircraft aftermarket services, offering leasing, technical consulting, trading and supply of equipment from entire aircraft through to piece part components.

AerFin is the market leader for delivering flexible component support solutions to the E-Jet and narrow-body markets and offers customised asset management solutions that substantially reduce the overall cost of ownership for aircraft and engine owners in a sustainable manner.

## About

AerMach Ltd is a UK based company offering the highest quality of supply chain solutions for the aerospace sector. We specialise in the sale, lease and exchange of airframe and engine whole assets and components.

Aermach specialises in the sourcing, provision and supply of high quality used serviceable material for stockists around the globe. The use of USM, allows our customers to reduce their cost and enjoy maximum savings.

Our engine services are aimed at saving customers time and money. We examine each shop visit to minimise the engine shop visit cost. Our material recovery programme is designed to create an additional revenue stream through the repair of post shop visit unserviceable material, which would otherwise be scrapped.

## About

Winslow Adaptics designs and develops products to mitigate supply chain shortages and obsolescence. From a DO-254 approved project that involves complex ASIC/FPGA retargeting to the machining of small metal and plastic parts, our design and development engineers have created cost effective and solutions at the highest quality for companies such as Boeing, Airbus, Honeywell and General Dynamics.

For decades our engineering and manufacturing team have met the challenges of providing technically demanding solutions for the severest environments. From the early stages of a design requiring a specific test module, to a solution for obsolescence that must meet the stipulations of harsh environmental tests, Winslow products have successfully met expectations.

## Bro Tathan

A world leading MRO location utilised by many MRO Hub members and boasts direct access to fully operational 1,800m (5,905 ft) runway and full airside support.

Bro Tathan, with its legacy of aircraft maintenance and engineering continues to be prominent in the national and international delivery of Maintenance, Repair and Overhaul (MRO). Unlike other airfields, Bro Tathan has developed with MRO as its principal activity. Albeit the demands of other users are not ignored, for example General Aviation (GA) have established separate areas for distinct activities.

Bro Tathan caters for all activities. Light aircraft and rotary operations operate to the south of the runway, whilst heavy engineering activities, including MRO take place to the north. This arrangement means that activities remain separate and that MRO traffic can operate with a significance not appreciated at other airfields, where revenue generating movements have priority.

## MRO Hub Capabilities

- Aircraft leasing
- Aircraft maintenance
- Engine maintenance
- Component manufacture
- Parts repair & exchange
- Tooling
- Ground support equipment
- Specialist machining
- Storage & parking
- Aircraft recycling
- Supply chain management
- Technical consulting
- Business aviation
- Skills & training
