SPACE SUPPLIERS SUMMIT

S³ IN BRIEF

The Space Suppliers Summit (S³) is an international business convention connecting buyers and suppliers from across the space industry supply chain, with a focus on smallsats and small launch vehicle manufacturing. The convention will be an occasion for companies to showcase their unique capabilities and know-how, share insights and ideas, and engage in meaningful and effective business meetings and high-level conferences.

S³ brings together key industry stakeholders, including: OEMs; top-tier suppliers; component manufacturers; start-ups; services and solutions providers; government representatives; academic institutions. The convention will connect enterprise from a regional, national, and global perspective.

The two-day event features a dedicated conference day, followed by one day of pre-scheduled business to business meetings. **We are expecting to welcome approximately 150 companies, 250 participants, and 10 countries to the event.**

INDUSTRY COVERAGE

SMALLSATS & CUBESATS

SPACECRAFT MANUFACTURERS

SMALL LAUNCH VEHICLES & SUBSYSTEMS

MATERIAL & COMPONENT SUPPLIERS

GROUND SEGMENT SYSTEMS & EQUIPMENT

INCUBATION & DEVELOPMENT

APPLIED RESEARCH

SOFTWARE & IT

Thank you to our partners

CONFERENCE

The S³ conference summit will explore the local and international developments in the space supply chain and surrounding infrastructures, both from a business and industry technology perspective.

The programme will examine what the rapidly-transforming space value chain means for industry today. Advancements in manufacturing technology and R&D, the increasing importance of green products and processes, as well as the impact of new market entrants, are key subjects that will be addressed as we explore the current challenges and opportunities facing the space sector.

KEY THEMES

Some of the key themes we will be covering include:

- Understanding where the space market opportunities are today
- Multi-sector industry collaboration to inspire new products and innovation
- Creating carbon neutral supply chains
- Workforce development to meet today's industry challenges
- How upstream can support downstream to capitalize on the data revolution?

EVENT PROGRAM

4TH OCTOBER INDUSTRY CONFERENCE

5TH OCTOBER BtoB MEETINGS

BtoB MEETINGS SELECTION PROCESS

1

REGISTRATION & PRESENTATION

Complete your online registration and company profile.

2

SELECTION OF CONFERENCES & MEETINGS

Select desired conferences and workshops to attend; review profiles of all other attending companies and submit meeting requests.

3

CONFIRM REQUESTS RECEIVED

When you receive meeting requests from other companies, you have the choice to accept or decline them.

4

RECEIVE YOUR PERSONALIZED SCHEDULE

Receive your personalized schedule of meetings and conferences.
